REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record, taken as a whole, does not show nor suggest the combination of limitations required by the claims. After further consideration, the rejection using Rhodes cannot be maintained for the following reasons. Rhodes discloses an oblique surface 28 on an inner sleeve insert 27. Or, the surface 28 can be formed integrally on the knuckle 29 (i.e. without the insert) (see Figure 3 and col. 3, lines 34-40). The first option lacks the oblique surface on the knuckle 29. The second option would lack the sleeve in the upper knuckle. There does not appear to be motivation to then modify the second option with another sleeve insert as required by the claims. And, it appears such modification would go against the teachings of Rhodes. Therefore, Rhodes fails to disclose the upper knuckle and polymeric sleeve as required by the claims in combination with the other elements. Toedt '314 also discloses a similar gravity hinge. However, Toedt fails to clearly state that the knuckle terminating surfaces are oblique at the same angle across their entire surfaces. Figure 1 appears to show otherwise. Toedt also fails to disclose the required materials and the polymeric sleeve in the upper knuckle. Finally, there does not appear to be motivation, absent Applicant's own disclosure, to modify the prior art in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
